1. What is the correct syntax for initializing a variable named dog, of type String, with the value "BARK"?
int dog = "BARK";
"BARK" = String dog;
odg = "BARK";
Chaire des - IIDADIVII.
String dog = "BARK";
2.Look at the following line of code:
1 int[] myList = { 1, 2, 3, 4, 5 };
What is the proper way to access the array element with the value 3?
2 myList.3;
1 myList[2];
1 myList["two"];
2 myList[3];

3.Look at the following code:

```
1 int i = 4;
2
3 if (i <= 3) {
4   | i = 0;
5   } else if (i <= 6) {
6   | i = 1;
7   } else {
8   | i = 2;
9  }</pre>
```

What value would i be after this if then else statement?

- O 1
- O null
- 2
- O^{0}

4.Look at the following function:

```
public String reverseName( String name1, String name2 ) {
    String reversed = name2 + ", " + name1;
    return reversed;
}
```

Which is the proper way to call this function?

- 1 ReverseName("John", "Doe")

 1 reverseName()

 1 reverseName("John", 100)

 1 reverseName("John", "Doe")
- 1 reverseName("John", "Doe")
